The Audit Management Module - One of the many modules of the Online Management Application

AS more and more of our customers are utilizing NAPT's new OMA software one of our more common questions is, "can I purchase just the quality management module?"

The simple answer is yes, you can.

In fact, when you view the fee schedule for the Online Management Application on our website you will see Asset, Contact, Document and the ILC Manager are the modules that are also for optional purchase.

The Audit Management module has become one of the more popular modules for lab managers to suggest to their organization to purchase; especially, because of the ability to design customer audits, assign audit tasks and produce audit reports.

Several of NAPT's OMA users are utilizing the Audit Management module particularly to better organize and track their audits while having the ability to set up any corrective or preventative actions.

Another great feature is the Document Management module, this feature fits nicely with the audit management module. It allows for the management of controlled documents as well as version and location control.

The Online Management Application (OMA) is divided into seven modules.

- ILC Management
- Contact Management
- Pending Actions
- Asset Management
- Audit Management
- Document Management
- and CAR/PAR
